About me

During my career, I try to understand the business domain and purposes of a project where I work. It helps me to understand better the essence of the product and continuously improve it. I pay much attention to the quality. I build reliable software solutions. Also, I like to share my knowledge and enjoy playing a mentor role.

Experience

Teamlead, Petrel AI – 2019-present

Developing an internal company management system. Playing also a BA role for the project. Leading a .NET pool of the company including help the other pool's developers to grow. Working with .NET Core, Angular 2+, Git, Kafka, IS4 and Docker.

Senior software developer, EPAM Almaty – 2018-2019

Developing an internal system for HR e-documents like DocuSign forms: drag&drop, PDF generation. Has implemented Hashicorp Vault secret storage. Playing a maintainer role, focusing on code-review sessions.
Worked with .NET Core, Angular 2+, Hashicorp Vault, Git and Docker.

Software developer, kaspi.kz bank – 2017-2018

Developing a FAQ website called Kaspi Guide. Implemented an Elasticsearch system integration, ELK log storage. Developed an integration with external KZ government portal. Took a participation in Google Analytics integration requirements forming. Have set up CI pipelines using TimCity.
Worked with .NET Framework, JQuery, ELK, Git and MSSQL.

Software developer, next.kz– 2015-2017

Developed a system to distribute Steam accounts from server to gamer computers by request. Developed an embedded app inside Bitrix 24 CRM. Developed a system for storing customers data. Worked with Google Scripts.
Worked with .NET Framework, JQuery, Laravel (php), Git and MySQL.
